

Scott Guthrie Lesson Plans - 5-25-17

Period 2: Game Design

Students are working through online tutorials to create a Platform game in Flash. They know where the tutorials are and should keep busy. I'd like them to upload the progress of their game to their Google Drive folder by the end of class. I'm expecting most people to be on tutorial 7 or the tutorials. I'll give them a progress grade this weekend.

Period 4: Web Design 2

The students are recreating the home page of paleysplace.com. There is a handout and one of the students can assist you with it. The handout explains the objectives of the final assignment. Felix can help students with any questions.

Period 6: Prep period

Period 8: Film 2

Colin Elliott, the district's film person, will be over for a visit to discuss a District film idea with some of the students. They'll be excited.

The students are working on their prompt films. They chose a film prompt and should be completing it soon. Please keep the film gear cabinet locked. Thanks
